

Band-Master ATS[®]

The Advanced Termination System for Interconnect Cable Shielding

High-volume pneumatic tool
for bench use

Easy-to-use manual tools
with built-in calibration counter

3 lengths and 3 widths of
EMI braid termination bands

SEPTEMBER 2020

Band-Master ATS®

Manual Tools and Bands

Standard Banding Tool

The 601-100 Band-Master ATS® Standard Tool with Counter for Standard Bands

Weighs approximately 1.30 lbs., and is designed for .240" width clamping bands in a tension range from 100 to 180 lbs. Calibrate at 150 lbs. $\pm$ 5 lbs. for most shield terminations. Tool and band should never be lubricated.

The 600-058 QPL Qualified (M81306/1A) Standard Banding Tool without Counter

Weighs 1.22 and is designed for .240" width clamping bands in a tension range from 100 to 180 lbs. Calibrate at 150 lbs. $\pm$ 5 lbs. for most shield terminations. Tool and band should never be lubricated (not shown).

Color-coded tool handle:

= Standard; Black

Standard Bands

Short Flat 601-005

Short Precoiled 601-006

Standard Bands are precision constructed of 300 Series SST passivate IAW AMS 2700. Short Standard Bands are 9.00 inches (228.6) in length and designed for use with the Band-Master ATS® 60-100 manual banding tool or the 601-106 pneumatic banding tool. Bands should always be double wrapped and will accommodate diameters up to approximately 1.0 inches (25.4).

Medium Flat 601-040

Medium Precoiled 601-041

Standard bands are precision constructed of 300 Series SST passivate IAW AMS 2700. Medium Standard Bands are 14.25 inches (361.95) in length and designed for use with the Band-Master ATS® 601-100 manual banding tool or the 601-106 pneumatic banding tool. Bands should always be double wrapped and will accommodate diameters up to approximately 1.8 inches (45.7).

Long Flat 601-049

Long Precoiled 601-050

Standard bands are precision constructed of 300 Series SST passivate IAW AMS 2700. Long Standard Bands are 18.0 inches (457.2) in length and designed for use with the Band-Master ATS® 601-100 manual banding tool or the 601-106 pneumatic banding tool. Bands should always be double wrapped and will accommodate diameters up to approximately 2.5 inches (63.5).

Band-Master ATS®

Manual Tools and Bands

Slim Standard Banding Tool

Color-coded tool handle

= Slim Standard; Orange

Choose Glenair Slim Standard Bands for size and weight savings. Slim bands are 50% lighter with 50% lower profile than our standard bands, while maintaining similar performance.

The 601-109 Band-Master ATS® Slim Standard Tool with Counter for Slim Standard Bands

For use with slim standard flat and pre-coiled quarter inch wide clamping bands. Tension range is approximately 30 to 80 lbs. Calibrate at 100 lbs. $\pm$ 3 lbs of linear pull. Tool weighs 1.2 Lb. Tool and band should never be lubricated.

Band-Master ATS® Slim Standard Band Selection						
Bands	Length		Part Number		Fits Diameter	
	in.	mm.	Flat	Pre-Coiled	in.	mm.

Slim Standard Bands

Slim bands are better at conforming to irregular platform shapes (elliptical platforms) and individual braid buildup (pig tails)

Short Flat 601-570

Short Precoiled 601-571

Slim Standard Bands are 50% lighter and 50% lower-profile than Standard Bands. They are precision constructed of work hardened, 300 Series SST passivate IAW AMS 2700. Short Slim Bands are 9.00 inches (228.6) in length and designed for use with the 601-109 Band-Master ATS® hand banding tool or the 601-110 pneumatic tool. Bands should always be double wrapped and will accommodate diameters up to approximately .94 inches (23.9).

Medium Flat 601-572

Medium Precoiled 601-573

Slim Standard Bands are 50% lighter and 50% lower-profile than Standard Bands. They are precision constructed of work hardened, 300 Series SST passivate IAW AMS 2700. Medium Slim Bands are 14.25 inches (362.0) in length and designed for use with the 601-109 Band-Master ATS® hand banding tool or the 601-110 pneumatic tool. Bands should always be double wrapped and will accommodate diameters up to approximately 1.8 inches (45.7)

Band-Master® ATS

Manual Tools and Bands

Micro Banding Tool

The 601-101 Band-Master ATS® Micro Tool with Counter for Micro Bands

Weighs approximately 1.20 lbs., and is designed for Micro .120" width clamping bands in a tension range from 50 to 85 lbs. Calibrate at 80 lbs $\pm$ 5 lbs. for most shield terminations. Tool and band should never be lubricated.

The 600-061 QPL Qualified (M81306/1B) Micro Banding Tool without Counter

Weighs 1.11 and is designed for Micro .120" width clamping bands in a tension range from 60 to 85 lbs. Calibrate at 80 lbs $\pm$ 5 lbs. Tool and band should never be lubricated.

Bands should always be double wrapped and will accommodate diameters up to approximately 1.88 inches (47.8).

Band-Master® ATS

Calibration Tools and Kits

Calibration Keys and Tension Gauges

601-205 Calibration Key

The 601-205 Calibration Key is designed for use with 600-058, 600-061, 601-211 and 601-212 manual banding tools. Material is black anodized aluminum alloy. One full turn clockwise will advance the tension range approximately 1.0 - 2.5 lbs, a counter-clockwise turn will decrease tension by the same amount.

Verification inspection window

601-211 and 601-212 Tension Gauge

The 601-211 (M81306/1C) and 601-212 (M81306/1D) Tension Gauge is used to check and calibrate the manual tool to values noted on calibration sticker. Constructed of hardened steel.

Part No.	SAE Part No. (Ref)	A +.015 (0.38) -.005 (0.13)	Used with Manual Tool P/N
601-211	M81306/1C	.460 (11.68)	Standard 601-100 • 600-058 (M81306/1-01 Kit)

601-205	M81306/1E	N/A	Both

Calibration Kits

601-200 Calibration Kit For All Banding Tools

The 601-200 Calibration Kit includes:

1. 601-200-3 calibration device
2. Fifty 601-203 Micro test bands
3. Fifty 601-202 Standard test bands
4. Fifty 601-217 Nano test bands
5. Fifty 601-224 Slim Standard test bands
6. Fifty 601-227 Micro Slim test bands
7. Fifty 601-230 Micro-Max test bands
8. 601-205 calibration adjustment key
9. Adjustable mounting bracket for meter
10. 601-218 tool adapter for 600-058
11. 601-219 tool adapter for 600-067
12. 601-220 tool adapter for 600-061, 600-068
13. 601-223 tool adapter for 601-109, 601-110, 601-100, 601-106
14. 601-225 tool adapter for 601-101, 601-107, 601-122, 601-123, 601-129, 601-130
15. 601-226 Tool adapter for 601-108 and 601-118

Range of the calibration device is 0 to 500 lbs, and accuracy is calibrated to ± 1 lbs. at factory. Digital readout in .1 lb. increments. Meter supplied with RS-232 serial communication port. Serial/USB adapter cable included.

Pneumatic Banding Tools

High-Volume Pneumatic Bench-Mount Units and Calibration Kits Available for Standard, Micro, Nano and Slim Band Termination Systems

601-106 Standard Pneumatic Banding Tool with Counter

The 601-106 Standard Pneumatic Banding Tool accommodates 601-005, 601-006, 601-040, 601-041, 601-049, 601-050, 601-052 and 601-054 standard quarter inch bands in a tension range of from 100-180 lbs. Calibrate at 150 ± 5 lbs for most shield terminations. Weight of the tool is 2.52 lbs (1.14 Kg); the control box weighs 3.51 lbs (1.59 Kg). Includes 601-400 foot pedal.

601-110 Slim Standard Pneumatic Banding Tool with Counter

The 601-110 Slim Standard Pneumatic Banding Tool accommodates 601-024, 601-025, 600-057 and 600-059 quarter inch Slim Standard bands. Approximate tension range of 30-80 lbs. Calibrate at 100 ± 3 lbs of linear pull. Weight of the tool is 2.52 lbs (1.14 Kg); the control box weighs 3.51 lbs (1.59 Kg). Includes 601-400 foot pedal.

601-107 Micro Pneumatic Banding Tool with Counter

The 601-107 Micro Pneumatic Banding Tool accommodates 601-024, 601-025, 601-060, 601-061, 601-064, 601-065, 600-057, and 600-059 eighth inch Micro Bands in a tension range of from 60 to 90 lbs. Calibrate at 80 ± 5 lbs for most shield terminations. Weight of the tool is 2.52 lbs (1.14 Kg); the control box weighs 3.51 lbs (1.59 Kg). Includes 601-400 foot pedal.

601-123 Micro Slim Pneumatic Banding Tool with Counter

The 601-123 Micro Slim Pneumatic Banding Tool accommodates 601-600, 601-601, 601-602, 601-603 Micro Slim bands. Approximate tension range of 60-90 lbs. Calibrate at 82 ± 3 lbs for most shield terminations. Tool Weight is 2.52 lbs (1.14 Kg); the control box weighs 3.51 lbs (1.59 Kg). Includes 601-400 foot pedal.

601-130 Micro-Max Pneumatic Banding Tool with Counter

The 601-130 Micro-Max Pneumatic Banding Tool accommodates 601-700, 601-701, 601-702, and 601-703 Micro-Max bands. Approximate tension range of 100-180 lbs. Calibrate at 132 ± 3 lbs for most shield terminations. Tool Weight is 2.52 lbs (1.14 Kg); the control box weighs 3.51 lbs (1.59 Kg). Includes 601-400 foot pedal.

601-118 Nano Pneumatic Banding Tool with Counter

The 601-118 Nano Pneumatic Banding Tool accommodates 601-570, 601-571, 601-572, and 601-573 Nano bands. Approximate tension range of 25-90 lbs. Calibrate at 50 ± 3 lbs of linear pull. Weight of the tool is 2.52 lbs (1.14 Kg); the control box weighs 3.51 lbs (1.59 Kg). Includes 601-400 foot pedal.

Band-Master® ATS

Manual and Pneumatic Tool Accessories

Accessories

601-400 Foot Pedal Control for 601-106, 601-107, 601-110 and 601-118 Pneumatic Banding Tools

The 601-400 Foot Pedal Control frees both hands to help assure more accurate, reliable and faster shield terminations.

601-401 Pneumatic Tool Balancer

The 601-401 Tool Balancer for use with pneumatic banding tools 601-104, 601-105, 601-106, 601-107. Load capacity, 1.5 (0.5 kg) to 3.0 Lbs (1.4 kg). Cable length, 6 ft (1.8 m). Reel weight, 1.3 Lbs (0.6 Kg). Pneumatic tool head weight, 2.52 Lbs (1.14 Kg)

600-164 Utility Shears

The 600-164 Large Broad Utility Shear for cutting amberstrand® and braided metal shielding also cuts rubber, cable jacketing, cable, plastics and rope. Weight: 0.55 Pounds, Shear Cut Length: 2.000.

Recommended AmberStrand® Cutting Procedure

Note: When cutting braid, both metal and especially composite, open cutter blades to allow the full 2" cut. Place braid all the way back onto blades as shown.

Band-MasterATS®

Shield Termination Assembly Process

1 Calibration Access Plug

2 Tensioning Lever:

Squeeze with short gentle strokes to tighten band to the proper tension. Lever will lock to **3 Handle** with final full stroke.

4 Cut-Off Lever:

Squeeze to lock band buckle and trim excess band material.

5 Cycle Counter

6 Band Insertion and Release Lever:
Depress lever to insert or release band from tool.

7 Serial Number

8 Tension Release Lever

NOTES:

1. Use only genuine Band-Master ATS® bands. Other manufacturer's bands may damage tool.
2. Use only .240" wide bands with 601-100 tool and .120" wide bands with 601-101 tool.

Video Training Series At:

<http://www.glenair.com/bandmaster/index.htm>

Step 1

Prepare Cable Braid for termination process

NOTE: Complete banding on an unfixed cable assembly. Terminating a band to a clamped or fixtured cable will affect the applied forces and interfere with the cut-off operation. The cut-off operation causes a rotation of the band termination in order to lock the band.

Step 2

Push braid forward over banding platform. Milk braid as required to remove slack and ensure a snug fit around the shield termination area.

Step 3

Double-wrap the band prior to use:

NOTE: Due to connector/adaptor circumference, it may be necessary to double-coil the band in place around the cable or termination area.

A. Loop/insert the leading edge of band through the buckle slot twice.
(Bands *must* be double-wrapped.)

B. Tighten the coil until the indicator mark (▷) is approximately .250 inches (6.4) shy of the buckle slot (see illustration at left). This will ensure sufficient band tail length for insertion into tool.

Step 4

Depress the band insertion and release lever (6), and insert the working end of the band into the front end opening of the tool, with the loop positioned outward as shown.

Step 5

The band termination area on all backshells is wider than the band. Position the band near the rear lip of the banding platform, allowing room for the buckle. For elliptical cable entries position the buckle off center of the peak of the circle. Failure to follow these guidelines will result in poor performance.

Position the band near the rear lip leaving room for buckle.

Step 6

Contract the band with the tensioning lever (2) using short, even strokes. As the band contracts firmly on the termination area, pull a full stroke to lock the lever against the main tool handle which will indicate the band is compressed to the proper tension.

NOTE: Overly rapid tightening of the band may result in uneven compression. If alignment of the band and shield is unsatisfactory, tension can be relaxed by pulling up on the tensioning lever (2) and then pushing the tension release lever (8) forward. Make adjustments as necessary and finish tightening with tensioning lever (2) as described above.

Step 7

Complete the clamping process by depressing the cut-off lever (4), allowing band and cable to rotate slightly. Pull up the release lever (6) to remove excess band for disposal.

NOTE: Always band on an unfixed connector/cable assembly.

Step 8

Trim away excess braid from the forward groove, particularly if a shrink boot is to be applied to the assembly.

Step 9

Visually inspect shield termination for problems.

NOTE: Band can be removed by lifting the buckle with a screwdriver or diagonal cutters.

Interconnect Assembly Tools

The right tool for every interconnect assembly requirement

**BandMaster™ ATS EMI/RFI
Shield Termination System**

**Backshell-to-Connector
Assembly Tools**

Glenair offers its connector and connector accessory customers every convenience in the provision of contact termination, shield termination, and backshell-to-connector assembly tooling. We are also proud to offer branded solutions from other well-known tool manufacturers such as Daniels (DMC) crimp tools. From pneumatic Earth-Bond tooling for the rail industry, to fiber optic termination and test equipment, Glenair is your most knowledgeable and reliable source for special-purpose interconnect assembly tooling.
