Product Overview

PHA-83W+ (RoHS compliant) is an advanced wideband amplifier fabricated using PHEMT technology and offers extremely high dynamic range over a broad frequency range and with excellent gain flatness. In addition, the PHA-83W+ has good input and output return loss over a broad frequency range. PHA-83W+ is enclosed in a SOT-89 package and has very good thermal performance.

Key Features

Feature	e Advantages	
Ultra Wideband: 50MHz to 8GHz	Broadband covering primary wireless communications bands	
Extremely High IP3 36.6 dBm typ. at 50 MHz 37 dBm typ. at 6 GHz	The PHA-83W+ matches industry leading IP3 performance relative to device size and power consumption. The combination of the design and PHEMT Structure provides enhanced linearity over a broad frequency range as evidence in the IP3 being approximately 12 dB above the P1dB point. This feature makes this amplifier ideal for use in: • Driver amplifiers for complex waveform up converter paths • Drivers in linearized transmit systems • Secondary amplifiers in ultra-High Dynamic range receivers	
Excellent Gain Flatness	Typical ± 1.4 dB gain flatness across the entire frequency range minimizes the need for external equalizer networks making it a great fit for instrumentation and EW application.
